# STEPS FOR LOGOUT

Note: Logout Activity needs active internet connection.

It is mandatory for the enumerator to sync all data before logging out. In case he/she does not sync data before logout, all the data recorded will be lost and cannot be recovered from anywhere.

Enumerator will also find his/her last sync date and time on this activity.

Step 1: User needs to click on the profile icon (☺) placed in the extreme right corner. A screen will appear on which user will find his/her details and also find a logout button. On click of this 'Logout' button Logout Activity will appear.	

Step 2: Here user will find 'Logout' button. On click of this button, a confirmation message will appear, click 'Confirm' to Logout.
