

Real-time App based Supervision for Supervisors & DNOs

A module for Real time Supervision through eLISS App is developed. This module generate suggestions pertaining to the data entered for the number of animals (Animal-wise & Group-wise) in all selected villages/urban wards. The working of the module is shown below:

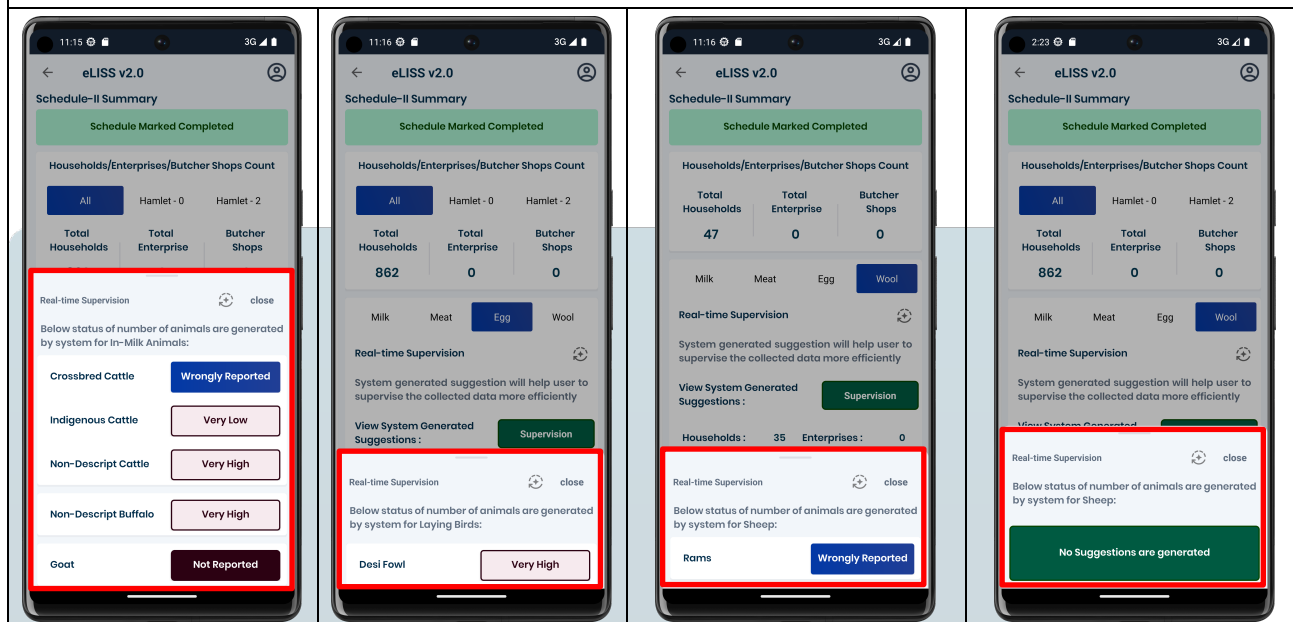

Step 1:

Select the village in which real time supervision is to be done.

In Schedule-II, select commodity and click "Supervision" button to view the generated real-time suggestions.

Step 2: Screenshots of generated suggestions

Details of generated suggestions

S No.	Generated Suggestion	Details
1.	Not Reported	It means that a particular group of animal pertaining to milk/ egg/ wool seems to be present but is not reported in the survey in that village/urban ward.
